

8. ENA EU Legislation WG

- ENA EU Legislation Working Group - Plant Health Questionnaire - 03-2015
 - Replies: 12 (71%)
- **ZP (Protected Zones)** As exposed during the General Assembly, the Plant Health authorities in some EU member states want to deregulate ZPs for some harmful organisms.

ZP (protected zones)

- Would the plant health authorities in your country like to have less ZP and less regulation on certain harmful organisms?

YES: SE, NO

NO: BE, BG, FI, PL, ES, UK, CH

Don't have ZP: DK, NL

Unknown: DE

ZP (protected zones)

- Is there a trend in your country to have more or fewer ZPs?

MORE: UK

EQUAL: BE, PL, ES, CH

FEWER: NO, SE

UNKNOWN / IT DEPENDS: BG, DK, DE, NL

ZP (protected zones)

How keeping ZPs is financed?

BE: Government finances the ZP. If new harmful organisms need to be surveyed, the sector needs to pay this extra.

BG: Financed by the government

DK: If the Industry request a ZP for a specific harmful organism the Plant Health authorities will assume the costs. It will be the Industry (the nurseries in the ZP) that should finance the ongoing cost to keep up the control of the ZP

FI: Inspections and laboratory analyses are covered by public funds. Eradication measures (destruction of plants etc.) would be covered by growers or by public funds as compensation to growers. So far there are no calculations of costs.

ZP (protected zones)

How keeping ZPs is financed?

DE: Currently unknown.

GR:

HU:

IE:

IT:

NL: The costs are assumed by the Industry or the participants of a specific program.

NO: The national food authorities.

PL: It is not clear by now.

RS:

ZP (protected zones)

How keeping ZPs is financed?

ES: --

SE: It depends on the organism. The companies pay for any controls made in their production.

For other organism the state pays for the controls made in public areas.

CH: ZP-B2: 90% is paid by the state, 10% by the producer; ZP-B4: I don't know => ask federal office for agriculture in Bern (Fredy Kley)

UK: Costs are shared between Government and growers
